Experiential Training Session: Content

- 1. Specific Examples of Nutrition App
- 2. Real life integrations Implementation of SMART goals

Nutrition and relevant Health Apps

Objectives

- ✓ To comprehend in depth the theory and implement it on relevant nutrition apps.
- ✓ To comprehend in depth the usefulness of SMART goals and to be familiar with their utilization.
- ✓ To comprehend, through real-life scenarios and situations, how nutrition apps may enable following healthier dietary habits and may help individuals' health in general.

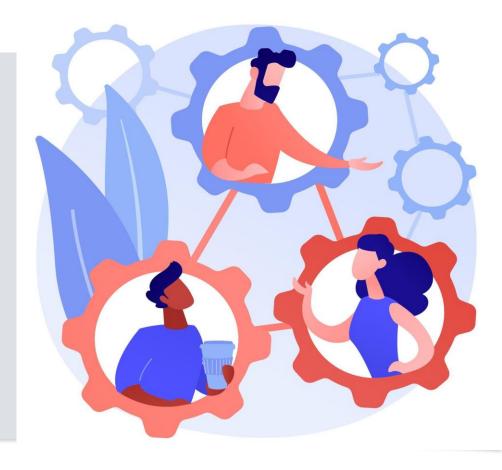

Nutrition and relevant Health Apps

Competences

- ✓ To equip participants with the skills required to leverage nutrition apps for achieving nutrition-related goals.
- ✓ To enhance the skills needed to make informed decisions about app selection, utilization, and integration into participants' everyday-nutrition, if they wish so.

6.2.1 Specific examples of Nutrition Apps

Objectives

- To be familiar with the most common types of Nutrition Apps.
- To identify and categorize app's type, main features and sections.
- To be familiar with using an app for the first time.

Example 1: YAZIO Fasting & Food Trucker (greek: YAZIO - θερμιδομετρητής)

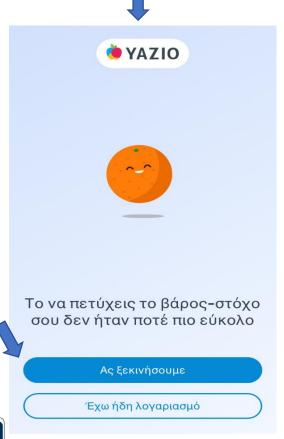

Calorie counter and intermittent fasting app that consists of 3 main sections:

- Calorie Counter: food diary with calorie goals, track of nutritional values & macronutrients, food database, built-in barcode scanner, create meals/meal plans, track steps/activities/ symptoms, water tracker with reminders etc.
- **Intermittent Fasting:** fasting timer, fasting & eating reminders, intermittent fasting plans etc.
- **Recipes:** new recipes every week, diet-specific recipes (e.g. vegan), grocery list feature, cooking mode to follow recipe instruction etc.

2 Nutrition and relevant Lon th Apps

The image popping up when you open the app for the 1st time, saying achieving your goal-weight had never been easier.

Choose your main goal

- 1 for weight loss
- 2 for weight maintenance
- 3 for weight gain
- 4 for muscle-mass build up
- 5 for anything else.

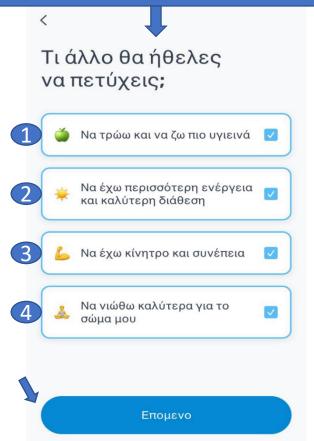

Click on the blue button to start your journey by tracking calorie & macronutrients, timing your fasting and building healthy habits.

Decide on what else you want to achieve by clicking on one or more

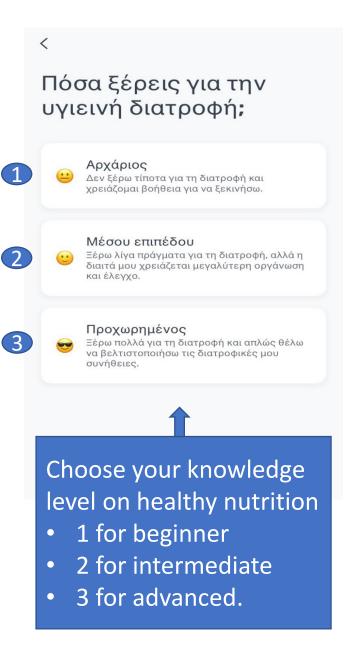

- 1 for eating healthy
- 2 for having more energy & better mood
- 3 for having motivation
- 4 for feeling better for your body.

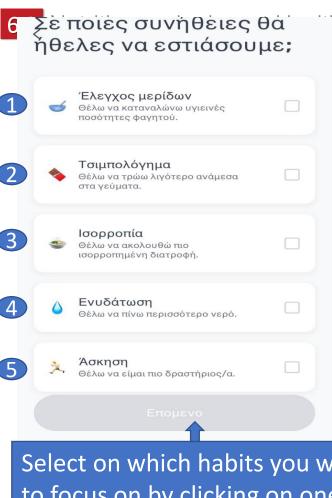

Select how you want the app to help you by clicking on one or more

- 1 for calorie counting
- 2 for physical activity monitoring
- 3 for healthy recipes
- 4 for providing analytics & stats.

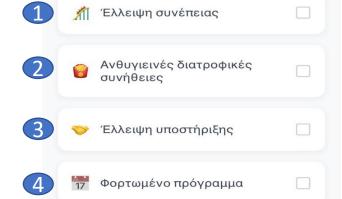

Select on factors holding you from achieving your goals:

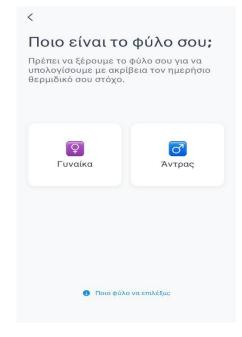

- 1 for lack of consistency
- 2 for unhealthy eating habits
- 3 for lack of support
- 4 for a busy schedule
- 5 for lack of inspiration for meal preparation.

Τι σε εμποδίζει να πετύχεις τους στόχους σου;

Έλλειψη έμπνευσης για

τα γεύματα

Enter your date of birth, height and gender.

Select on which habits you want to focus on by clicking on one ore more:

- 1 for portion size control
- 2 for avoidance of snacking
- 3 for balanced nutrition
- 4 for hydration
- 5 for working out & exercise.

- 1 for light
- 2 for moderate intensity
- 3 for intense
- 4 for highly intense.

Πόσο δραστήριος/ α είσαι;

Το καθημερινό επίπεδο δραστηριότητάς σου θα μας βοηθήσει να υπολογίσουμε με ακρίβεια τις θερμιδικές σου ανάγκες.

Enter your weight-goal.

Ακολουθείς συγκεκριμένη διατροφή;

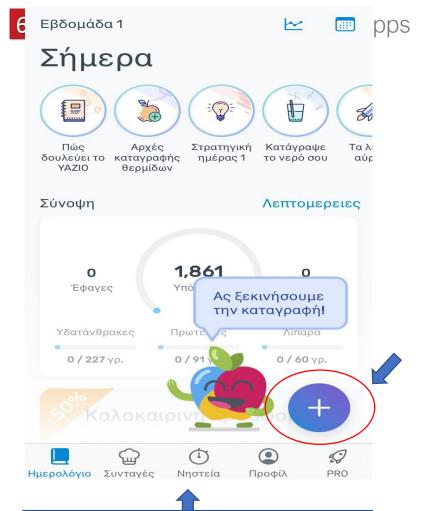

Θα προσαρμόσουμε τις προτάσεις μας στις προτιμήσεις σου.

- Specify whether you follow a specific diet by clicking on:
- 1 for eating all group foods
- 2 for being pescatarian (i.e. eating fish but no meat)
- 3 for vegetarian
- 4 for being vegan.

🤰 🍇 Ιχθυοχορτοφαγική

Κλασική

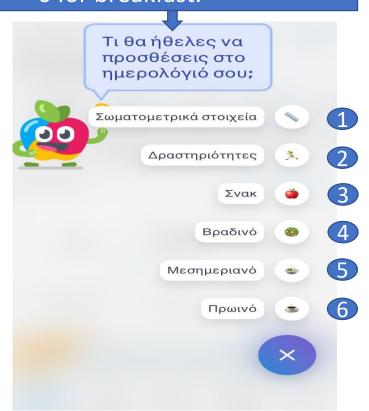

- 3 // Χορτοφαγική
- 4 Yegan

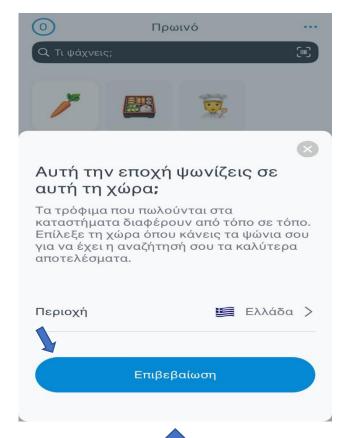

The home screen image showing once you complete all previous necessary data entry. The 'apple mascot' is inviting you to start recording by clicking on the + sign.

Select what kind of recording you wish to start entering:

- 1 for height, weight, circumferences
- 2 physical activities
- 3 for snack
- 4 for dinner
- 5 for lunch
- 6 for breakfast.

In case of entering food records, select the country from which you are currently shopping in to 'access' the right food database of the app.

Example 2: Water Reminder - Remind Drink (greek: Υπενθύμιση νερού – Υπενθυμίστε)

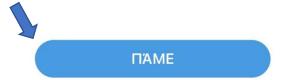

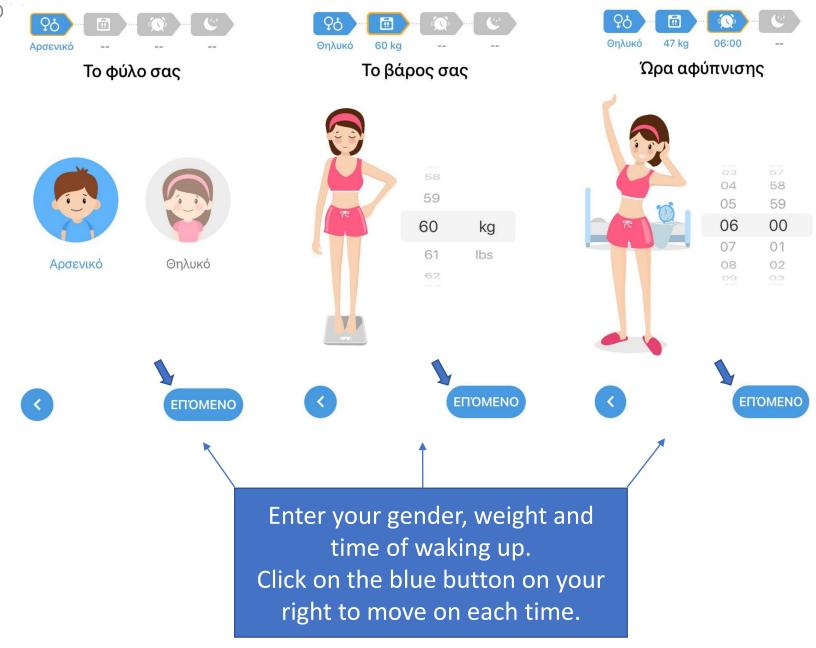

- A free application with main function to help keep water tracker.
- Main features:
 - \blacksquare Based on gender and weight \rightarrow let users know how much water should they drink a day.
 - Diverse menu of about 20 different drinks.
 - Choose the amount of water drunk each time.
 - Smart reminder: time mode of going to bed so users do not get drink water reminder.
 - Water tracker by week, month and year in the chart.
 - Achievements to encourage users to accomplish their daily goal set.
 - Allows integration of data into health application.

Γεια σου, είμαι ο προσωπικός σας σύντροφος ενυδάτωσης

Προκειμένου να παρέχουμε συμβουλές ενυδάτωσης, πρέπει να λάβω ορισμένα βασικά στοιχεία. Και θα το κρατήσω μυστικό.

Ώρα για ύπνο

Enter the time you are going to bed at night.

Health Apps

Your personal hydration-plan shows your adequate daily water intake

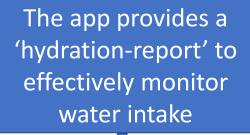

Πόσο πρέπει να πίνετε

12 φορές την ημέρα 167 ml κάθε φορά

2/4

It explains how many glasses of water are required and the quantity needed to meet your adequate daily water intake

Παραλείπω

Προσωπικό σχέδιο ενυδάτωσης

Ελέγξτε την αναφορά ενυδάτωσης και δείτε την αναλογία σας

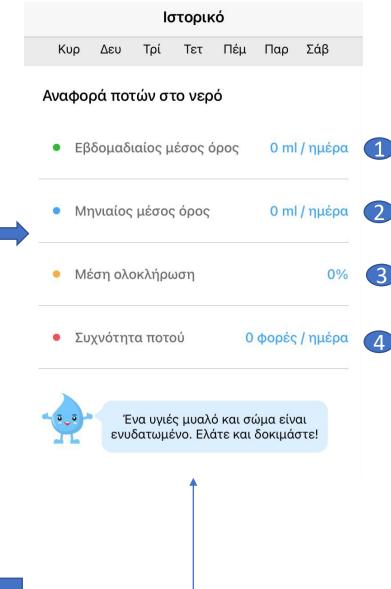

6. The home screen image th Apps

The home screen image showing once you complete all previous necessary data entry.

Your water history page. Click on each option to check the stats and diagrams:

- 1 for weekly average intake (ml/day)
- 2 for monthly average intake (ml/day)
- 3 for mean % completion
- 4 for frequency of drinking times

Click on the 'clock' sign to access your water history.

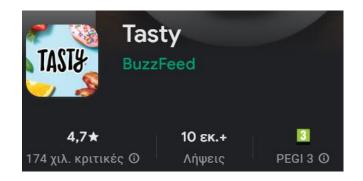

6.2.2 Real life integrations – Implementation of SMART goals

Objectives

- To provide real-life scenarios of how nutrition apps may enable following following healthier dietary habits and may help individuals' health in general.
- To present different real-life scenarios where nutrition apps could be beneficial.
- Learners to set their own nutrition-related SMART goals and intergrade them in nutrition apps.

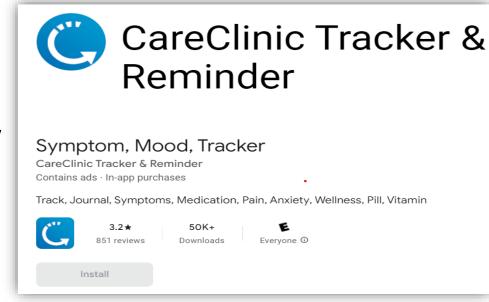

Looking for inspiration

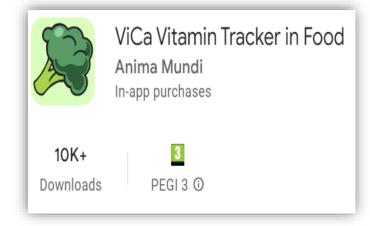

- M.: age 40, working a full-time job, mother of 2 children.
- M. has run out of inspiration for preparing a nice and healthy meal for herself and her children. She is bored of cooking the same options every week and she wants to find new cooking recipes that will be easy to make and will appeal attractive for her children to try.
- M. decides to download a Nutrition App containing healthy delicious recipes from which she gets ideas.

Managing & monitoring a micronutrient deficiency

- N.: age 22, student, iron deficiency anaemia diagnosed by her doctor.
- The doctor recommended her starting a daily iron supplement and receiving adequate amount of iron through her dietary intake.
- N. decides to download an app to remind her to take the daily iron supplement and to track her intake of iron (mg) through inserting the foods and drinks she consumes.

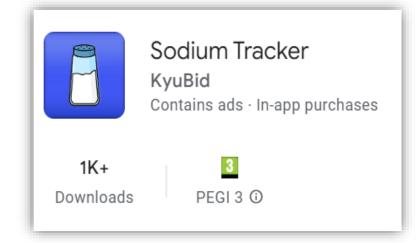

Managing Hypertension

- T.: male, age 65, retired, one previous heart attack incidence, diagnosed with hypertension.
- The doctor advised him to decrease the consumption of salty foods and not to exceed the intake of 3g of salt (sodium) daily.
- T. decides to download an app to monitor and calculate his daily sodium intake by entering all the foods he consumes and to discover low-salt options.

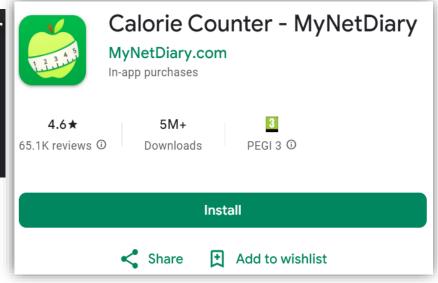

Monitoring calorie to control body weight

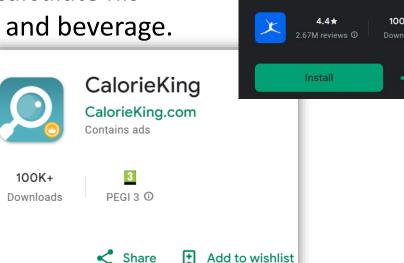

- J.: male, age 35, working part-time.
- He wants to lose weight and his dietitian friend advised him to eat about 2,500 kcals/day in order to start losing 0,5kg/week.
- J. decides to download an app to monitor and calculate his calorie intake by entering each consumed food and beverage.

MyFitnessPal: Calorie

Counter

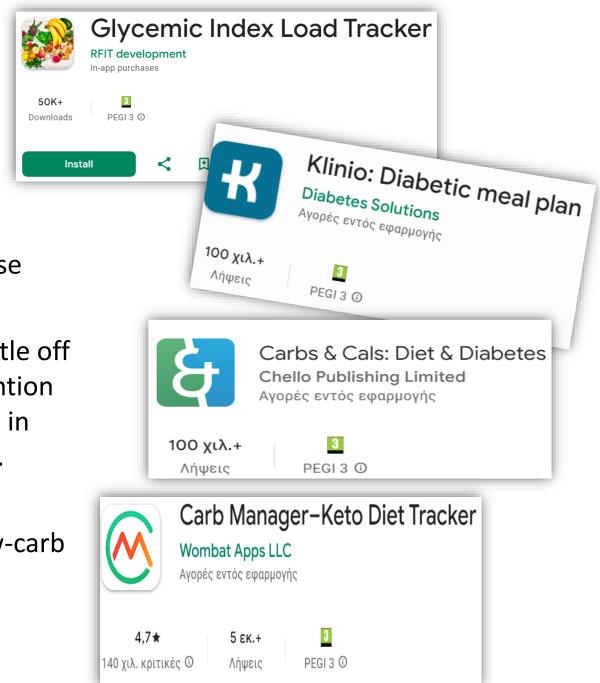

Contains ads · In-app purchases

Managing Diabetes

- K.: female, age 30, diabetes type 1 patient since se was 8 years old.
- Her last blood results show her sugar level is a little off course. Her doctor advised her to pay more attention to the carbohydrates she consumes in each meal in combination to the amount of insulin she injects.
- K. decides to download a nutrition app to track carbohydrate intake of each meal and to find low-carb recipes.

Scenario X?

Suggestions?

Any other scenario that a Nutrition App could be useful?

Activity: Setting & implementing nutrition-related SMART goals

Set your own nutrition-related SMART goal

- Share your goal with the rest of the group.
- Check whether it is actually a SMART goal (fulfill) prerequisites?).
- Is it related to a specific food group (e.g. fruits), is it related to body weight or a health condition?
- Why did you choose this goal?

Activity: Setting & implementing nutrition-related SMART goals

Brainstorm and discuss:

How could you integrate these goals in a nutrition app?

What kind of app will you use to track the progress of your goal?

Is there a difficulty you might face?
