# Experiential Training Session: Content

1. [Interactive identification of healthcare services apps and different types](#)

## Competences

- ✓ To equip participants with the skills required to assess public and provide healthcare services.
- ✓ To encourage participants by practical activities to apply their newly-gained knowledge
- ✓ To enhance the skills needed to make informed decisions about app selection, utilization, and integration into participants' everyday life

[Source](#) | [Pixabay license](#)  
[Image by vectorjuice on Freepik](#)

### 11.2.1

## Interactive identification of healthcare services apps and different types

### Objectives

- To become familiar with the most popular healthcare services apps
- To differentiate between public and private providers of healthcare services apps and their specific interests
- To collect and assess several examples
- To create an own plan for the beneficial use of healthcare services apps

[Image by vectorjuice on Freepik](#)

## Healthcare services apps

Service-oriented apps, for example, remind users to take their medication, monitor their vaccination status and remind them of check-ups. In some cases, they can even be used to make appointments with doctors. They can also be used to monitor symptoms or the progression of an illness.

# Healthcare services apps in Germany

[Source](#) | [Pixabay license](#)

Co-funded by  
the European Union

## Healthcare services apps of public providers in Germany

**Public providers** of apps with health services are, for example, federal and state ministries, health authorities, subordinate healthcare authorities and institutions that are largely financed with public funds.

## Healthcare services apps of public providers in Germany

**"Corona-Warn-App"** from the Federal Ministry of Health: This app was developed to slow down the spread of COVID-19. During the period of high COVID-19 infections, it warned users if they had come into contact with an infected person and gave instructions on what to do next.

<https://www.bundesregierung.de/breg-de/themen/corona-warn-app/corona-warn-app-faq-1758392>

## Healthcare services apps of public providers in Germany

### Electronic patient file (ePA)

This is made available to health insured persons voluntarily as an app on their mobile devices. It is intended to replace analog record keeping and ensure simpler networking between service providers such as doctors' surgeries, pharmacies, hospitals, etc.

**Objective:** To simplify data exchange for service providers and thus increase safety and treatment quality for patients

**Range of functions:** The ePA can be filled with documents, findings, doctors' letters, medication plans, etc., which can then be retrieved according to the situation and purpose

**Control of data access:** users determine which data is stored in the ePA; access by service providers is only possible with the user's authorisation

## Healthcare services apps of private providers in Germany

**Private providers** of apps with healthcare services are often IT companies, pharmaceutical groups or health insurance companies.

Health insurance companies are primarily involved in the area of prevention and service offerings that facilitate online communication with the health insurance company, help in the search for a doctor or manage health data.

## Healthcare services apps of private providers in Germany

### "Meine TK" from Techniker Krankenkasse:

This app enables people insured with the health insurance company "Techniker Krankenkasse" to access their insurance data, apply for benefits, and use health services such as video consultations or online courses.

<https://www.tk.de/techniker/leistungen-und-mitgliedschaft/online-services-versicherte/tk-app-2027886>

### Die TK-App

Gesundheit & Fitness

★★★★★ 4.8

[Source](#)

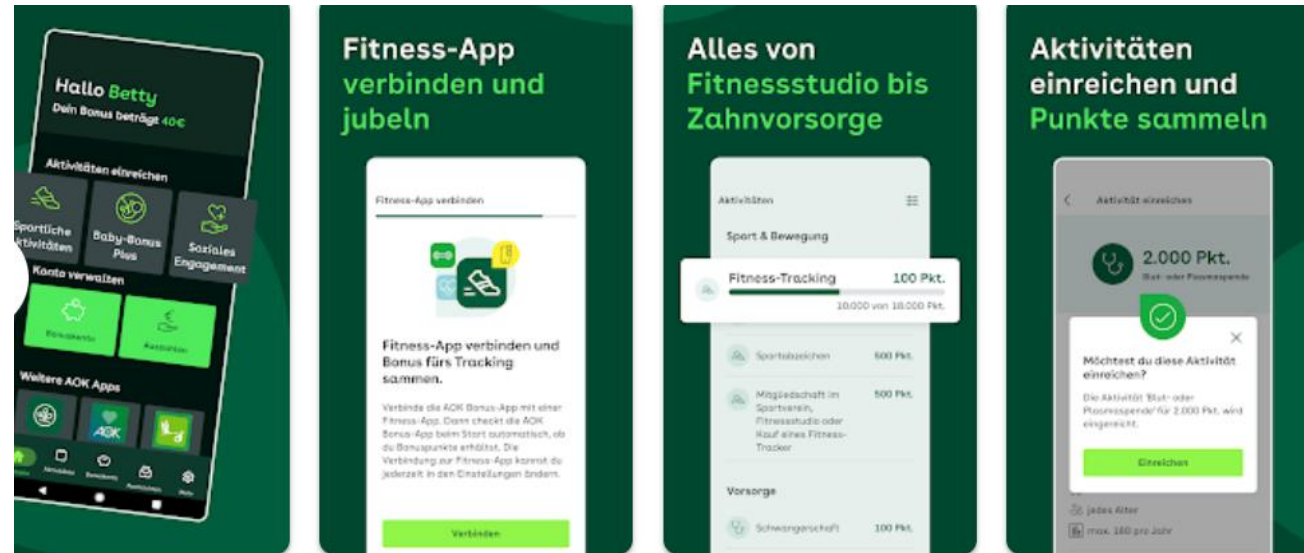

## Healthcare services apps of private providers in Germany

"**AOK Bonus App**" from AOK: This app is provided by the German health insurance company AOK and rewards health-conscious behaviour with bonus points that can be redeemed for rewards.

It also offers functions for making appointments and personalised health promotion.

<https://www.aok.de/pk/medien/apps/>

## Healthcare services apps of private providers in Germany

**"Vivy" from Vivy GmbH** (in cooperation with various health insurance companies): This app serves as a digital health portal and enables users to manage their medical findings, vaccinations and appointments, store health data securely and share it with doctors.

The app is available in English, German, Spanish and Turkish:

<https://www.vivy.com/vivy-app>

## Healthcare services apps in Spain

[Source](#) | [Pixabay license](#)

## Healthcare services apps of public providers in Spain

**Electronic Medical History (HCDSNS).** This system allows all Autonomous Communities to share relevant clinical information so that it is available electronically to all citizens.

In the following link, people can access the Electronic Medical History depending on the region they are being treated:

[https://www.sanidad.gob.es/areas/saludDigital/historiaClinicaSNS/Accesos\\_HCD\\_SNS.htm](https://www.sanidad.gob.es/areas/saludDigital/historiaClinicaSNS/Accesos_HCD_SNS.htm)

Through these platforms, people can access, save, or print all their clinical reports.

## Healthcare services apps of public providers in Spain

**Regional Health System Apps.** These apps offer several services to the patients, depending on the region they are being treated. The most common services are:

- ★ Management of health appointments.
- ★ Quick and easy access to relevant information offered by the Regional Health Authority.
- ★ Identification methods both in health centres and pharmacies.

Examples of these Apps are the **App GVA + Salut** (for the Valencian Community) and **Tarjeta Sanitaria** (for the Community of Madrid)

## Healthcare services apps of private providers in Spain

**Doctoralia: Docplanner Health.** This app allows to book online/in-person appointments with more than 120,000 specialists from all over the country.

People can filter searches by specialty, city, postcode, health insurance (Adeslas, Allianz, Asisa, DKV, Mapfre, Muface, Sanitas, Zurich, etc.), and treatments.

Available for:

- <https://play.google.com/store/apps/details?id=es.doctoralia&hl=es> (Android)
- <https://apps.apple.com/es/app/doctoralia-cuida-de-tu-salud/id1444682103?l=ca> (IOS)

## Healthcare services apps of private providers in Spain

**ASISA.** With this app, people are be able to:

- Search for the doctor they need by specialty and proximity.
- Book an appointment online at the hospitals and centres.
- Request a video consultation with specialists.
- Find out which tests require authorisation and request it.
- Retrieve information about the insurance.

Available for:

- <https://play.google.com/store/apps/details?id=com.asisa&hl=ca&gl=US> (Android)
- <https://apps.apple.com/es/app/asisa/id444680982?l=ca> (IOS)

# Healthcare services apps in Italy

the European Union

## Healthcare services apps of public providers in Italy

Because the Italian healthcare system is highly decentralized, every region and autonomous province created its own online tools to access on-line services. Some regions are technologically more advanced and their apps allow users to access a wide set of services (choose and change doctor, book blood tests and doctor appointments, etc...) while others are still in the beta version.

## Healthcare services apps of public providers in Italy

“**La Tua Salute**” from the ‘Istituto Nazionale per la promozione della salute delle popolazioni Migranti e per il contrasto delle malattie della Povertà (INMP) is an informative guide for EU and non – EU citizens in Italy on:

- the right to healthcare and how to access the Italian National Health Service (Servizio Sanitario Nazionale - SSN);
- the main SSN services for prevention, health protection and care;
- the importance of prevention and adoption of healthy lifestyles at any age.

**La tua salute App** is available in: Italian, English, French, Romanian, Spanish

<https://www.inmp.it/eng/La-Tua-Salute-App>

## Healthcare services apps of public providers in Italy

“I.C.A.R.E. (Integration and Community Care for Asylum and Refugees in Emergency)” is a web app developed within the FAMI I.C.A.R.E. project in order to support migrants and refugees in accessing health services in Emilia-Romagna, Lazio, Tuscany and Sicily.

The web app features useful information in different languages spoken by migrant people in Italy: <https://icare.sanita.toscana.it/it/>

## Healthcare services apps of public providers in Italy

### **Fascicolo Sanitario Elettronico (FSE) - Electronic Health Record (EHR)**

Is a set of health data and digital documents intended to replace analogue record keeping and ensure simpler networking between service providers such as doctors' surgeries, pharmacies, hospitals, etc.

**Objective:** To simplify data exchange for service providers and thus increase safety and treatment quality for patients

**Range of functions:** The EHR can be filled with documents, findings, doctors' letters, medication plans, etc., which can then be retrieved according to the situation and purpose

[Source](#) [Pexels Licence](#)

## Healthcare services apps of public providers in Italy

## Healthcare services apps of private providers in Italy

**Private providers** of apps with healthcare services are often IT companies, pharmaceutical groups or health insurance companies.

Even Apps created by private providers, following the general organisation of the SSN, might be limited to specific areas and territories.

## Healthcare services apps of private providers in Italy

**“PharmAround” from Develon Srl:** This app helps the user locate open pharmacies in the area, the services they provide, and the available products.

<https://www.pharmaround.it/#app-download>

## Healthcare services apps of private providers in Italy

**“FreeStyle LibreLink - IT” from Abbott Diabetes Care Inc.:** This app allows people affected by diabetes to monitor their glucose level using a smartphone and a specific sensor to be applied on the arm.

The SSN gives access to this service for free, if patients are entitled to an exemption.

## Healthcare services apps of public providers in Greece

- For the time being, **the public providers** of apps in Greece is the Ministry of Digital Governance.
- The pandemic brought Greece a little bit closer to eHealth with providing several digital platforms to better self-manage health.
- However, public providers focused more on the use of platforms based on Internet browsers than applications.

## Healthcare services apps of public providers in Greece

- In 2021, the Ministry of Digital Governance launched the development of mobile apps regarding:
  - ✓ Preventive medicine: new parents will receive notifications on their mobile phones as a reminder to vaccinate their children. Furthermore, citizens are expected to receive personalised updates on preventive examinations based on their age and gender.
  - ✓ Teleconsultation: This initiative, which will start from mental health and dermatological diseases, is particularly important especially for border and island regions, as it puts remote doctor-patient communication in a clear and unambiguous framework.

## Healthcare services apps of public providers in Greece

### MyHealth (in Greek only)

- myHealth is an application that is part of the overall framework of services for the electronic service of citizens in matters of their health and the medical procedures they need.
- myHealth is provided to citizens to access their prescriptions and diagnostic test referrals, as well as their Electronic Medical Certificates.
- AMKA (the social security individual unique number) is required to enter the app
- <https://play.google.com/store/apps/details?id=gr.gov.myhealth&hl=el>

## Healthcare services apps of private providers in Greece

- The **Let's ΠΑΠ** is the first Greek application for a woman's health.
- The app aims to inform on how women can stay healthy and protected from cervical cancer.
- Through the app women can know exactly their cycle, record the experienced symptoms and receive nutrition and exercise tips that will make them feel better.

Other components:

- convey the message of life, the value of prevention in the fight against cervical cancer for loved ones
  - have access to a range of courses for active prevention of cervical cancer and the HPV virus
  - record the cycle and inform accurately about the date of the next period and ovulation days
  - receive dietary advice related to symptoms and to relieve
  - be informed about a number of health issues such as diet and exercise by professionals
- <https://play.google.com/store/apps/details?id=gr.aenorasis.letspap&hl=el&gl=US>
  - <https://apps.apple.com/us/app/lets-%CF%80%CE%B1%CF%80/id1294578686?ls=1>

## Healthcare services apps of private providers in Greece

- With the use of the **all4Diabetes** application, the public has universal access to the most authoritative, timely and valuable articles based on the guidance of the medical community.
  - The application search platform on a daily basis locates, categorises and refers to articles from popular and trusted websites of health content, related to diabetes.
  - Users of the application can find the contact details of doctors, based on their location, in order to make an appointment.
  - In the diary, users record their mood daily and add as a reminder their appointment with the health professionals of their choice.
  - Through quizzes, users can enrich their knowledge about issues of diabetes.
  - The app is under the auspices of the Panhellenic Federation of Associations - Associations of People with Diabetes Mellitus

## Healthcare services apps of public providers in France

### Mon Espace Santé (My Health Space)

Launched at the beginning of 2022, it is the evolution of the Dossier Médical Partagé (DMP). Mon Espace Santé is a personal digital health space for storing, managing and sharing health information and documents in complete security.

## Healthcare services apps of public providers in France

### TousAntiCovid

Application developed in the context of the COVID-19 pandemic to help track contacts, provide information on the progress of the epidemic, and provide access to vaccination and test certificates. It is an example of how the French public sector can rapidly adapt to a health crisis using digital technologies.

## Healthcare services apps of private providers in France

### Doctolib

Although Doctolib is a private company, it works closely with many public hospitals and independent healthcare professionals in France to facilitate online appointment booking, teleconsultation, and medical calendar management.

## Activity: Collect in a pre-defined template several apps

- You learned about different examples of public and private healthcare services apps
- Now navigate through the internet and explore core features and settings
- Collect 1-3 healthcare services apps in the language of your country of arrival
- Fill in the pre-defined template

### 11.2.1 Pre-defined template for the Experiential Training Session

Name	Owner/Programmer/Provider	Public / private provider?	Cost	Platform (link)	Target Group (e.g. "Children", "Elderly", "Women", "Dealing with Pain", "Mental Problems", "certain diseases")	Description
1 Student Health App	Trinity College Cambridge	Private	Free	<a href="https://apps.apple.com/de/app/student-health-app/id934979379">https://apps.apple.com/de/app/student-health-app/id934979379</a>	Students of Trinity College Cambridge / Great Britain	<p>The Student Health App offers plain-talking reassurance, info and advice on over 125 topics relevant to students in areas such as...</p> <ul style="list-style-type: none"> <li>&gt; first aid &amp; emergencies</li> <li>&gt; common ailments</li> <li>&gt; mental health problems</li> <li>&gt; physical (body) symptoms</li> <li>&gt; love and sex</li> <li>&gt; healthy living</li> <li>&gt; travel health</li> <li>&gt; alcohol &amp; drugs</li> <li>&gt; long-term health problems</li> <li>&gt; staying safe at university</li> <li>&gt; accessing health services...</li> </ul>

## Activity: Create your own plan for using healthcare services apps

- Are there health topics that are relevant for the learner/a friend/a child/relatives (e.g. recurrent headaches, pre-existing diseases, need for preventive health measures)?
- Which healthcare services apps are available targeting these topics (e.g. sensors, apps on alternative treatments, special clinics)?
- Which app/s would be beneficial?
- Include this app / these apps in a pre-defined template as a plan for future use.

### 11.2.1 Pre-defined template for creating a plan for using healthcare services apps

	Name of the beneficiary	Health topic to be tackled	Name of the app	Platform (link)	Description	Why is this app beneficial for the user?
1	Margerita	Painful tensions due to lack of physical exercise	TK App	<a href="https://www.tk.de/techniker/magazin/digitale-gesundheit/spezial/tk-fit-2066260">https://www.tk.de/techniker/magazin/digitale-gesundheit/spezial/tk-fit-2066260</a>	This is an app of a health insurance company that also offers a fitness programme which rewards physical activities	The aim is to relieve painful tension in the muscles.
