Check the Self-Learning Outcome

- This session can be organized face-to-face or online.
- The learners are asked to present their plan for using healthcare services apps linked to their own person or to a friend or relative. They are asked what kind of challenges they faced – if any – and how they coped with it.

The outcome will be

- a collection of examples of healthcare services apps in their country of arrival (based on the identification of healthcare apps)
- a priority list of healthcare services that the learners regard as specifically useful for them/a friend/a relative (based on the plan for using healthcare app services)

Resources:

- Filled in templates of 11.2.1 and 11.2.2 (WORD documents)

Provide Feedback & Discuss

- *Which app was the most **interesting**?*
- *Which app was the most **difficult** to find?*
- *What **barriers** did you face, if any, during your app navigation?*
- *What app features **facilitated** and what features **complicated** your navigation and overall experience?*

Finally, the trainer congratulates the learners to their learning experience and outcome.
